1. Represents accrued interest divided by amortized cost of interest earning debt investments (excluding investments on non-accrual status) held on 6/30/2026.

2. Represents the cash interest received or entitled to be received on interest earning debt investments (excluding PIK interest and OID) in the respective quarter annualized, divided by the average of the total cost basis at the beginning and end of such respective quarter of total debt investments.

3. The CLO equity cash distribution yield shown is calculated by taking the quarterly distributions received, or were entitled to be received, for the CLO equity investments which were scheduled to make a distribution to OXSQ (which includes investments where there was full cashflow diversion), annualizing such amount and dividing by the current cost basis of those investments. It does not include CLO equity which had not made its initial distribution to OXSQ by quarter-end or CLO investments which have been optionally redeemed.

4. As a percentage of the total invested portfolio fair value as of quarter end. Excludes cash and equivalents.

5. Due to rounding, totals may not add up to 100%.

6. "Other" includes common stock, preferred stock, warrants, convertible notes, and Simple Agreements for Future Equity (SAFEs).
