The CLO equity cash distribution yield shown is calculated by taking the quarterly distributions received, or were entitled to be received, for the CLO equity investments which were scheduled to make a distribution to OXSQ (which includes investments where there was full cashflow diversion), annualizing such amount and dividing by the current cost basis of those investments. It does not include CLO equity which had not made its initial distribution by quarter-end or CLO investments which have been optionally redeemed.

4. As a percentage of the total invested portfolio fair value as of quarter end. Excludes cash and equivalents.
